

5409, BOTTLED WATER BUSINESS

\$ 120,000

Fraser Lake, British Columbia

Bottled water business for sale. Deliver to residential, commercial and industrial customers. Approximately 150 customers in 3 different communities. We bottled between 18,000 and 22,000 bottles per year. Gross revenue for 2019 exceeded \$153,000.00 dollars. The customer base is continually growing but the owners are getting older and are finding the work a bit much. We bottle all the water without machinery so it is a job for a younger person. We have a retail store for the customers who would rather pick their water up and we sell water filters, coolers, and bottles water dispensers. We have operated for 23 years and are the largest supplier in our region. The opportunity for growth is large as we are currently seeing a gold mine and a LNG pipeline starting in the area we supply. The building we operate out of is owned and is for sale as well if interested but a rental agreement is also available if needed. The community of Fraser Lake is a good place to settle as the lifestyle is relaxed and friendly. The surrounding area offers much in the way of recreation. We are surrounded by lakes and rivers with some of the best fishing in the country, as well as opportunities for hiking and skiing nearby. The cost of living is low and the air is clean and fresh. We have really enjoyed our time as water purveyors and we have the most loyal customers anyone could ask for.
