## Business Description

Fully Licensed Cannabis Seed and Genetics Company for Sale.

A profitable turnkey operation with sales agreements to major markets. This Health Canada licensed cannabis seed company is operating out of the beautiful Okanagan in BC.

It is selling under its own unique brand and has supply agreements to BC, AB, SK, and ON.

## Facilities

Discrete, secured, GPP compliant, fully operational, Health Canada licensed, state-of-the-art facility with accompanying approved Standard Operation Procedures.

## **Growth/Expansion**

This business was the first Licensed Producer to focus on the consumer product seed market under its unique brand. Seed sales in Canada have been growing month over month and year over year since legalization. Growth in this segment will continue as the illicit market is removed. Annual illicit cannabis seed sales are reported to be around \$2.4B globally. This business has the ability to export seed to new and emerging markets around the world as they come online with cannabis regulations.
